Comments:

TrueERP has helped us manage our sales, invoicing and purchasing processes. When we need support it's good. I've always used the California office, they are very friendly and can answer any question!

Pros:

I like the ability to drill-down, it helps you find information faster, and I love the feature you have with templates, you can construct them on the fly.

Cons:

Nothing that I really like least. For the most part, any issue we've had has been resolved.

Recommendations:

Make sure when you make the conversion, to know which accounts you're using because it will impact reports.
